	Recycling rate	85.6%	84.7%	89.9%	94.8%	92.8%
Hazardous chemicals disposal	Volatile organic compounds (VOC) (kg)	14	20	37	3	210
	Perfluorocarbon (PFC) (kg)	0	0	0	0	0

*1 Scope 1 is direct emissions of the company (calculated from the gasoline usage of company vehicles)

- *2 Scope 2 is indirect emissions from the use of energy purchased by the company (calculated from electricity use)
- *3 Scope 3 is the emissions in the entire supply chain excluding Scope 1 and Scope 2
- *4 Calculated by dividing the amount by non-consolidated annual revenue
- *5 Figures of water use and water use by source are based on the data shown in water utility bills for the HQ premises
- *6 There is no data of the volume of wastewater discharged to sewage, and it is estimated to be the same as the volume of municipal water
- *7 "Other" includes surface water (rivers, lakes, etc.), groundwater, seawater, and wastewater from other organizations
- *8 Starting FY2024, the figures include subsidiary data
